## Smooth and Pleasant Operations

When developing the SIP VP-T49G, Yealink kept even the smallest of details in mind for users. For example:

- The large, eight-inch touch screen boasts support for multi-touch operations, offering unbelievable ease of use.
- The full keyboard and intelligent search support simplifies user input.
- The easily manageable Control Center and Notification Center functions empower users with one-button access to frequently used functions, streamlining and accelerating day-to-day use.

## Rich Media Ports for Maximizing Functionalities

- The High-Definition Multimedia Interface (HDMI) connection further extends users' video experiences.
- The solution's built-in USB2.0 port offers users multiple benefits including local HD call recording and screenshot functionalities using a USB flash drive, as well as power charging for smart phones and other devices.

## Wireless Technology for Added Convenience and Flexibility

The solution boasts a built-in Wi-Fi connection, as well as Bluetooth functionality for hands free use and phonebook synchronization between the solution and users' smartphones, adding freedom and flexibility to the office environment.
